Re: DMWRA – WSPS Flood Mitigation Improvements – I-Jobs Application

To Whom it May Concern:

The two projects planned to mitigate the flood damage caused in 2009 do not apply to the I-Jobs requirements of meeting the current state building energy code or Energy Star® standards. One project includes the replacement of a direct fired makeup air unit of which Energy Star® standards do not apply. The other project is a strictly civil project including dirtwork and a pump station. The pumps in the pump station will be specified Premium Efficiency type. If you have questions, please don't hesitate to contact me.

Sincerely,
Howard R. Green Company

Mike Halde, P.E.
Project Manager
